## GLASS PROTECTION

Keeping glass protected is your number one priority. Look to **TBP Squareman Pads** for the fantastic durability and padding you need. A special coated adhesive braves all UV and temperature elements, and a consistent bonding strength protects and pads glass every time without leaving any residue after removal. Plus, our pads have low compressibility and offer sufficient bounce and recovery properties that act like a super shock absorber. And you just can't say the same for cork.

### Characteristics

- Bright Coloring In Red & Blue for Easy Visibility
- Low Compressibility of the Pad Allows Layers of Glass to Remain Separated at all Times and the Technical Design
- Leaves Zero Residue on Glass
- Reduces claims of broken glass - saving money and time
- High Density Material Provides Excellent Shock Absorption
- Sufficient Bounce and Recovery Properties
- Allow a Shock Absorption Factor to be Present - Unlike Cork

TBP CONVERTING, INC OR ANY OF THEIR ASSOCIATED COMPANIES MAKE NO WARRANTIES OF ANY KIND AS TO THIS PRODUCT, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. If you allege this product is defective, your exclusive remedy shall be, at TBP CONVERTING, INC or any of their associated companies' option to replace or repair the product or refund the purchase price of the product.

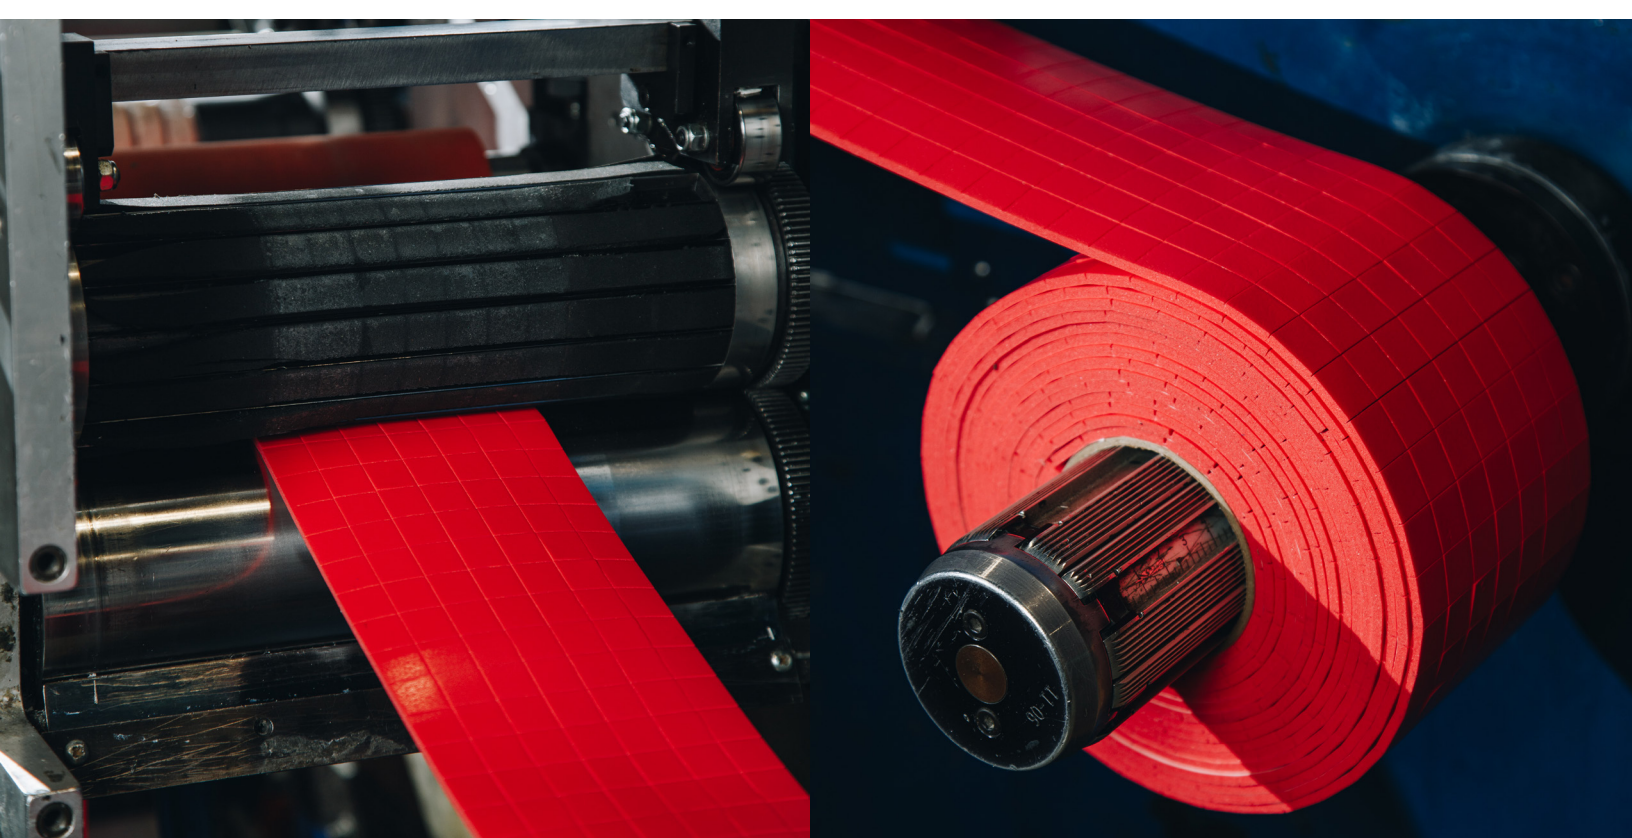

All product selection should be made after appropriate engineering consultation and review of technical specifications. See: Manufacturer's technical specification sheet for applicable warranty information and disclaimers.

### Applications

- Residential and Commercial window protection
- Suitable for Die Cutting
- Replaces the cork pad for Protection of Glass and other fragile materials
- Protective barrier on metal and plastic surfaces

### Features & Benefits

- Clean Removal from Glass - No Residue
- Consistent Bonding Strength and Clean Peel
- Prolonged Periods in Contact with Glass
- Squareman Pads conform to glass reducing shock on glass
- Solvent Based Acrylic Adhesive is UV and Temperature Resistant
- Will Not Deteriorate or Breakdown

*TBP Squareman Protection Pads must be stored in its original packaging in a clean, dry, well ventilated area. Under these conditions a 6 month shelf life minimum will apply. The expectancy of the product once in use will depend on the conditions under which the glass or substrate is stored, additional heat and humidity will affect the aging process of the PVC foam but not the adhesive bond itself. Low temperatures at the time of the application may increase the possibility of condensation on the surface, which will reduce the final bond strength.*
