

Squareman™ Shipping Pads - High Performance Foam

High-performance foam with a custom designed 'ghost free' adhesive. Its bounce and recovery properties allow for superior performance over other shipping & spacer pads.

Applications:

The ideal product for shipping of sensitive materials. Its high density helps absorb and transfer impacts that can shatter glass. The material is also well suited for stacking of heavy materials while maintaining spacing between the substrates.

Customization:

- Can be die cut to specified shapes for your needs
- Can be double laminated for increased thickness
- Available in Blue, Red, and Green for high visibility

PROPERTIES	TEST METHOD		VALUE
Thickness, mm	AFERA 4006	Range	1.0-4.5
Density kg/m ³	SGTM 14	Range	220-600
180° Peel Adhesion N/cm	AFERA 4001	Maximum	2
Shore Hardness 00	SGTM 27	Range	55-90
Force to Compress by 30% N/cm ²	SGTM 24	Minimum	10
Service Temperature		Long Term	-40 to +70 F
