

Q300 California Compliant Contact Adhesive

Fast Tack, Water-Resistant, California Compliant

Q300 California Compliant Contact Adhesive

Features

- Fast Tack, Great for Multiple Substrates
- Quick Tack Formula
- Water-Resistant Bond
- Meets and Exceeds the SCAQMD Rule 1168

Description

Quality Aerosols Q300 California Compliant Contact Adhesive is a high strength, high shear, fast tack adhesive. Q300 is specially formulated for making permanent or temporary bonds. It can be used on paper, cardboard, fabric, leather, foil, fiberglass to metal, wood and a variety of other substrates. Q300 has a water resistant bond.

Applications

Q300 is used for the permanent or temporary bonding to metal, cloth, fiberglass, leather, foil and other substrates.

Product Usage

Q300 Adhesive is designed as a two surface bonding application. All surfaces should be tested for compatibility. Surfaces need to be dry and free of oil and debris. Spray an even coat of adhesive to cover 85%-95% of the surfaces. Allow adhesive to dry 3-5 minutes until it becomes tacky. For porous surfaces it is recommended to apply a second coat after the first coat has become tacky. Put the coated surfaces together and apply pressure. Full adhesive strength will be reached in 24 hours.

Storage

Store in a cool, dry, and well ventilated area. Do not handle or store near open flame or other heat sources. We recommend storing at or above 65°F. Bulk and canister products should be kept off the floor.

Product Specifications

Color	Natural
Solids	26% +/- 2%
VOC Content	38.1%
VOC Compliant CARB/OTC	Yes
Bonding Range	3-60 minutes
Dry/Tack Time	3-5 minutes
Spray Pattern	Web
Sizes Offered	12 oz
Warranty Period	1 year from manufacture date

Recommended layout **2.5g/ft²**
